To Whomsoever It May Concern

This is to certify that Ms. Swarnim Sharma, a 4th year B.E. student in Information Technology & Mathematical Innovations at the University of Delhi, successfully completed her summer internship at Flare Lab, Department of ECE, Indian Institute of Science (IISc), Bengaluru from 1st June 2025 to 30th August 2025.

During her internship, Swarnim worked on the development of Python and MATLAB codes for data acquisition, processing, and hardware control of a spectral domain OCT system. She independently coordinated with vendors and collaborators to design a highly efficient, user-friendly GUI capable of displaying spectrograms, axial scans, and saturated intensity profiles under varying spectrometer control parameters. She further extended this GUI by integrating a Python-based control program for a galvo scanning system to acquire B-scans.

Over the course of three months, Swarnim demonstrated exceptional productivity, diligence, and strong self-learning skills. She exhibited a keen ability to solve problems independently and delivered high-quality outcomes within the given timelines. Her performance was impressive, and with continued exposure, I am confident that she has the potential to become a capable and independent researcher in the future. I wholeheartedly recommend her for any academic or professional opportunity she chooses to pursue

Thank you
